Plant is Insect Terror

Has the Properties of A Sticky Fly Paper and No Insect Can Escape

One of the most curious plants is found in the riverbank of the Pennsylvania University. The name of this wonderful plant is the Pinguicula, and the name is as long as the plant is small. The plant is small and modest and has a pretty flower and pretty leaves. Despite its innocent looks and small size it is an object of terror to all insects. For it has the qualities of fly paper and should any guileless insect stop upon its sticky leaves it could never get away because the leaves have a sticky substance upon them which retain the insect. As every insect passes this plant, its inviting look tempts insects to spend a few minutes of recreation upon its pretty leaves. But alas! it never leaves the surface of the leaves until it is absorbed by this fly-catcher, when it goes to enrich the constitution of the plant. As the leaves are always covered with insects, the plant nourishes into one of the most thrifty plants. "This insect-catcher" of Divine Nature would be a boon and a blessing to many housewives who are troubled with mosquitoes and flies. For if a few of these plants were placed on a table in a room infested with the above-named insects, the room would soon be free from these little pests which are so abundant during the warm weather.—Inving W. Finkle.

Strong Women

By Dr. Valentine Mott.

Women and men too—just as strong and healthy as the surface of the leaves until it is absorbed by this fly-catcher, when it goes to enrich the constitution of the plant. As the leaves are always covered with insects, the plant nourishes into one of the most thrifty plants. "This insect-catcher" of Divine Nature would be a boon and a blessing to many housewives who are troubled with mosquitoes and flies. For if a few of these plants were placed on a table in a room infested with the above-named insects, the room would soon be free from these little pests which are so abundant during the warm weather.—Inving W. Finkle.

blood. Without good red blood a woman has a weak heart and poor nerves. In the spring is the best time to take stock of one's condition. If the blood is thin and watery, face pale or pimply, if one is tired and listless, generally weak, a Spring Tonic should be taken. An old-fashioned remedy that was used by nearly every body 50 years ago is still safe and sane because it contains no alcohol or narcotic. It is made of roots and herbs and called Dr. Pierce's Golden Medical Discovery. If druggists do not keep it in tablet form, send 50 cents for a vial to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y.

Poland's Improved Position

Victories in Russia Enable Them To Consider Peace Negotiations

Victories won by the Polish armies in Russia have placed Poland in such a position that within a short time it will be able to receive peace negotiations with the Bolsheviks, the Polish Legation was informed by its government.

"The Polish government," the cable message stated, "has given proof of its peaceful intentions in notes and official communications. The manner in which Poland has treated the Ukrainian question proves the complete absence of any imperialistic aspirations or intentions of conquest. The victories of our army have placed us in a position that within a short time we will be able to reconsider peace, leaving to the Soviet government the privilege of choosing the place for the negotiations from among the places proposed by Poland and which will answer the purpose for which intended."

Keep Minard's Liniment in the house.

Don't Quit the Home Garden

World Shortage of Food Incentive to Increased Production

"During the war a drive was made to persuade people in cities to help win it by consuming less food and by raising what they could in yards and gardens. Their response in both directions did help win the war and with that tremendous strain over there has been a general let-down, which, coupled with continued shortage of farm labor and unsatisfactory crop conditions, constitutes another serious threat to the maintenance of the world on anything like a normal food basis.

The winter wheat crop seems certain to fall 250,000,000 bushels below the 732,000,000 bushels of last year. The spring crop, it is estimated, will add not more than 200,000,000 bushels, giving a total of perhaps 650,000,000. In other words, unless the scraping of bins brings out an unexpected surplus, our wheat production will hardly support our own needs. This is not a pleasing prospect, and it should prompt the city man who took up home gardening as a war measure and who now regards it as something of a fad to continue it for the present purpose of getting stuff to eat at a reasonable figure.—Baltimore News.

Bought Brother's Watch From Hun

A remarkable incident connected with the war has occurred at Pontesbury, a Shropshire village. A German, having watches, sold one to a man named Sankey, who was surprised on opening it to find his brother's name inscribed therein. He bought the watch after considerable bargaining.

The brother who lived at Pontesbury, served in the Scots Guards and was killed in France in 1914.

May Recover Lauretic Gold

A London cable to the Montreal Star says: The government salvage steamer Racer has sailed for Southampton bound for the Irish north coast in an attempt to raise the £3,000,000 worth of specie which is lying in the bulk of the White Star liner Lauretic, a score of fathoms below the ocean surface. The Lauretic was sunk either by submarine or mine while on a voyage to America in the early part of 1917.

Serbia Land of Centenarians

Serbia is the land of centenarians. In that country, figuring on the present number of centenarians in proportion to the whole population, one person in every 2,200 lives to the age of 100 years. In Denmark and Switzerland, on the other hand, the average is less than one to a million of population.—Indianapolis News.

Divorce and domestic infelicity are virtually unknown among the Eskimos.

Good Prospects in Irrigation Block

Swedish Colony on Bow Slope Area Prospecting

A few miles south of Brooks, in the eastern section of the Canadian Pacific Railway's Irrigation project in southern Alberta, a very productive district has sprung up during the last two or three years. This district lies to the north of the Bow River, on what is known as the Bow Slope, and has been found especially suited to irrigation.

In one of the best parts of the Bow Slope is the Swedish colony of Upland, which was established in 1918 and which now has a population of about 300 people and an area cleared of 8,500 acres under crop. In 1918 the acreage under crop was 600, in 1919, 2,200 acres were cropped and this year an authoritative source states that 8,362 acres of land has been seeded.

The Bow Slope produced heavy crops last year and the settlers there look for heavy production in 1920, as conditions are in every way a great deal more favorable. About 4,000 acres of the total in crop is being seeded to wheat, and it is expected a splendid crop, especially on new broken land. Last year as high as 23 bushels to the acre was raised on Bow Slope farms. As the land is getting in better shape, alfalfa is being planted, and already about 200 acres are under alfalfa seed, made up of small plots on various farms.

Throughout the whole irrigation block, moisture conditions are excellent, and a great deal of breaking is being done. Many farmers have been working night and day, both to get in all the wheat possible and to prepare new land for crop. On the farms of the Duke of Sutherland work has been done in two shifts and wheat seeding is now completed with two thousand acres in crop.

Notwithstanding there is sufficient moisture everywhere for rapid germination, preparations for irrigating are being made and every possible minute is being taken advantage of to get the ditches in shape and ready for the water which is expected to be turned on within the next week, or, at the very latest, the first of June.

She Had Noticed It

Mrs. Bighow—I admire your husband so much. He has such a logical mind. Mrs. Tunstall—Yes, he's terrible logical. He's got a different lodge for every night in the week.

NEURALGIA AND SCIATICA

Caused by Starved Nerves Due To Weak Watery Blood

People generally think of neuralgia as a pain in the head or in the face, but neuralgia may affect any nerve of the body. Different nerves are given to it when it affects certain parts. Thus neuralgia of the Sciatic nerve is called Sciatica, but the character of the pain and the nature of the disease is the same. The cause is the same, and the remedy, to be effective, must be the same. The pain of neuralgia, whether it affects the face and head, is caused by starved nerves. The blood, which the nerves carry nourishment to the nerves, for some reason no longer does so and the exciting pain you feel is the cry of the starved nerves. The blood itself is weak and thin. When you build up the thin blood with Dr. Williams' Pink Pills, you are attacking neuralgia and kindred diseases at the root. As proof of the value of these pills in cases of this kind we give the statement of Mrs. Thomas McGirr, of North Malden, Ont., who says: "I have been a severe sufferer from sciatica, which attacked the sciatic nerve in the left leg. At times the pain was most excruciating and as a result of the trouble there was a great shrinking of the leg. I could only hobble about by using a cane, and if I attempted to go to the fire I would fall. I tried down every little while to ease the agony I felt. I was under medical treatment, but there was no improvement shown. I was getting very despondent, as the trouble was affecting my general health. Finally a friend advised me to try Dr. Williams' Pink Pills and I decided to do so. I took the pills faithfully for several months, finding a gradual and increasing improvement in my case, until finally every vestige of the trouble had gone, and I was again enjoying the blessing of good health and freedom from pain. What Dr. Williams' Pink Pills did for me seems almost a miracle, and I hope that my experience may benefit some other sufferer."

If you are suffering from any ailment due to weak blood avail yourself at once of the splendid home treatment which Dr. Williams' Pink Pills so easily afford, and you will be among those who rejoice in regained health. These pills are sold by all dealers in medicine, or may be had by mail at 50 cents a box of six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

"Got a hacking cough and a headache."

"Well, I've a little wood you could hack and it might cure your head."

"What a stupid, stupid man, but my 'cure' ain't of the splittin' variety."

The Canadian government is building 60 ships with a deadweight tonnage of 325,000.

The administration of an oath in judicial proceedings was introduced by the Saxons 600 A.D.

Cotton has been grown in India since prehistoric times.

Land or Settlement

Millions of Acres of Arable Land in The West Lying Idle

To foster co-operation and unity between east and west in Canada, to people 20,000,000 acres of vacant lands and thereby secure a vastly increased national production, to enlarge the domestic market and reduce the Dominion's war debt—these are among the notable purposes of the Western Canada Colonization Association. The promotion of desirable immigration is the solution proposed, and for this purpose a fund of \$1,500,000 will be required.

It is estimated that there are at least twenty million acres of arable land lying within twenty miles of existing railways, exclusive of those held by the government, the Hudson Bay Company and the railways, that should be brought under cultivation. The Western Canada Colonization Association, having behind it the whole business confidence of the three western provinces, and many business and financial leaders in eastern Canada, is endeavoring to conduct a work which the government cannot do, and its motives are regarded as so worthy that the utmost co-operation is being extended by all those who have thus far been approached.

The object is not to buy or sell these lands, but to advise prospective settlers of their true value. Such lands are now privately held, and the heavy unearned increment taxes imposed by the western provinces on vacant land disposes owners to sell at a reasonable price. Further than that, the general interests and well-being of the new settler will become the care of the organization until he is on his feet.

The Care of Your Car

It Always Pays to Operate A Car With Care

"To get the maximum enjoyment and comfort from your car you must be thoughtful of it," says an authority. "Do not race the motor unnecessarily. Be warned by every abnormal noise. If it is a squeak, locate it, and lubricate the part. If caused by loose parts, locate them and tighten the bolts."

"Don't tinker. Half the ability to make an adjustment or repair is the ability to discover its necessity. If all adjustments are carefully made when needed and every bearing and working part is well lubricated, the smooth operation will be continuous with a minimum of attention."

"By neglecting details you may save time at the start, but you will make up for it in the long run." "Do not maintain too high a speed in driving. The time saved will not offset the liability of accidents, nor the extra wear to which the car is subjected. This is a loss in dollars and cents. You will find that a normal rate of speed will conserve the life of your car and give you the utmost return in economical service. It is not the number of miles covered in a given time that counts most, but the number of miles of travel that can be obtained at the least cost for fuel, oil, tires and adjustments."

Minard's Liniment used by Physicians

A Perfect Antidote

Two rich girls have been arrested in New York stores during the past week on the charge of shop-lifting. In each case their lawyers claim they were the victims of aphasia. It seems they walked into the stores, looked around and suddenly the world became blank. They did not come back to their normal senses until detectives tapped them on the shoulder and said they were under arrest. It seems a good detective is an absolutely perfect antidote for aphasia.—New York Correspondent.

Reading the Great Book

A good deal is said in these days of the need of quieting the unrest and nervous excitement that prevails among all sorts of people. Possibly a course of bible study would prove a better cure than anything yet tried. Also it might have its effect in encouraging the better Americanism we all profess so much desire to establish. Certainly the bible reading plan ought to meet with widespread acceptance.—Chicago Evening Post.

Minard's Liniment Co., Limited

Gents.—I have used your MINARD'S LINIMENT in my family and am satisfied for years and consider it the best medicine obtainable. Yours truly, A. FRED ROCHAV, Proprietor, Roxton Pond Hotel and Livery Stables.

Preserving Spider Webs

Naturalists employ an ingenious method in order to preserve the web of the spider. The webs are first sprayed with a thin solution of artists' shellac and then, if of the ordinary geometric form, they are pressed carefully against a glass plate, the supporting threads of the web being severed. After the shellac solution has dried, the plates carrying the webs are stored in a cabinet for later use in scientific work.

Huge Irrigation Projects

More Land Is Brought Under Irrigation in Alberta

Another large area of land in southern Alberta has been brought under irrigation during the last few days when water was turned into the main ditch of the Canada Land and Irrigation company, east of the Little Bow Reservoir, for irrigating what is known as the Vauchall district, where 5,000 acres of land purchased by settlers from the United States, will be put into crop this year. The water will be ready for use on the farms.

Water was turned into the main ditch from the Bow river intake, 40 miles east of Calgary, a year ago last fall, and since then the huge reservoir in the Snake Valley, known as Lake McGregor, which is nine miles long and holds enough water to run the entire project for a year, has been filled. Some weeks ago, water was turned from this reservoir into the main ditch to the east, and the reservoir at Little Bow, which holds enough for a month's operations, was filled. Now the water has been turned out into the ditches from this reservoir.

The turning of the water into the ditches marks the successful culmination of an engineering project which has been in course of development for a number of years. It is ten years or more since the project was first undertaken, and since then it has been through various reorganizations and changes, until it culminated in the amalgamation of three distinct companies into the Canada Land and Irrigation company. The main ditch of the project is 175 miles long, and from this it is ultimately planned to irrigate 220,000 acres of land.

Catarrh Cannot be Cured

by LOCAL APPLICATIONS, as they cannot reach the diseased area. The disease is a local disease, greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE will cure catarrh. Cheney & Co., Prop., Toledo, O.

America gets more than one-third of its glass from Pennsylvania.

Unskilled Workers Are Well Paid

Sugar Plantation Workers in Honolulu Get Big Bonus

With sugar selling at 19.50 cents a pound, the monthly bonus rate which is being paid to sugar plantation laborers in Hawaii amounts to 34 per cent of the wage rate, or a daily wage rate of \$3.42 for the lowest paid unskilled laborer. In other words the laborer who receives a basic wage of \$20 a month is now being paid \$69 a month, the \$21 man is being paid \$79.34, and the \$24 man is being paid \$84. If sugar goes to 20 cents, the lowest paid unskilled laborer will receive \$71 in wages and bonus. Under the Hawaiian plan, the laborer is paid his wages and 75 per cent of his bonus each month, the remaining 25 per cent of the bonus being retained for him until the end of the bonus year.

Messages From Mars

As soon as their expenses are guaranteed, Prof. David Todd, Amherst college astronomer, and Leo Stevens, foremost American astronomer, will ascend into the upper air for another attempt to hear the messages certain scientists maintain are being wireless from Mars. It is the dream of Todd's entire life to establish a communication with the red planet, proving his contention that a race, wise in the ways of science and nature, dwells there.

A Problem

Applicant—What I want is a bed-sitting-room for a gentleman about 24 feet long by 12 feet wide. Agent's Clerk—You'll have great difficulty, sir. I could scarcely find one, and I'm only five-foot four.

A Link With the Past

Old-timer at Edmonton Recalls Stirring Life of Early Days

To be seized and dragged from your horse by a party of Indians on the warpath; to be tied to the stump of a tree and have brush piled about your feet, amid the jeers of the painted savages, and, just as the brush was fired, to be rescued by your companions who had heard your screams—Did it ever happen to you, even in your dreams? Yet this is only one of the experiences that are milestones in the history of one of Edmonton's oldest citizens. Telephone Alexander Blair, born 89 years ago on the banks of the St. Lawrence, "Daddy Blair," as he is known, is spending the evening of last eventful life in the Alberta capital, living again in his tales of the past his adventures in the days when the west was "West," when as frontier mail-carrier, scout, hunter and trapper, on foot and on ponyback, he travelled the prairie and the northland from B. C. to Manitoba, and from the Yukon to the Dakotas. Probably no living man has made a longer mileage in the west, or all over the world, than this French-Canadian old-timer, now janitor of a "mission" in Edmonton.

Music by Long Distance Wireless

Remarkable Experiment Successfully Carried Out By Wireless Telephone

A large audience at the Chateau Laurier assembly hall heard perfectly a gramophone playing in Montreal and also Miss Lott singing in that city over one hundred miles away by means of wireless telephone. It was arranged by Dr. A. S. Eve, in connection with an address on some great war inventions, before the Royal Society of Canada. The experiment took place at nine o'clock and by means of a Magna Vok the voice of the distant singer was quite distinctly heard in all parts of the hall.

Hundred Murder Cases

Carnival of Crime in the City of Chicago

One hundred murder cases—the biggest homicide calendar ever given a criminal court in the United States—have just been placed in the hands of six Chicago judges.

Two judges who, in the past, have heard nothing but murder cases in the Chicago Criminal Court, have been added for help, and four additional judges have been added to clear up the violent maze.

Henry Barrett Chamberlain, head of the Chicago Crime Commission, explained the carnival of crime as being the most forcible example on record of the need of Americanization of the alien elements.

The great majority of the one hundred murders were committed by aliens, or by new Americans who have not absorbed the American spirit, he said. "Americanization is a high sounding term to many persons. To the man in the street it means teaching the foreigner to read and write and spell and to know the name of the President—a job for school teachers and reformers."

Para-Sani Wrapper

Heavy, waxed paper in Household Rolls, with handsome oak Roller-Box. Para-Sani is cheaper and more convenient than waxed paper in loose sheets and the paper is of better quality.

Local Talent Concert

The local talent concert, given under the personal direction of Prof. Touche, in St. Andrew's church, on Friday evening last was a distinct surprise to everyone present. For its outstanding excellence. Indeed it is no exaggeration to say that such a programme for out-of-town anything has occupied the boards during the past winter, and the only criticism expressed on all sides was that the admission was too low. This should be an added reason however why the people of Lacombe should enthusiastically support any future venture, as to the merits or demerits of the programme, it would be difficult to single out any particular item for special mention, everyone being excellent. There is no doubt however but that the Lacombe concert orchestra is here to stay. The spirited renderings of "Village Festival" and "National Wreath" left nothing to be desired. The Senior Choir of St. Andrew's Church gave a fine exposure of the church's talent. "The Miller's Wives" in which light and shade effects were brought out remarkably well. The well known "cherry" song, "Smiling Morn" was rendered with snap and precision, just as it should be, and the closing chorus "The Lullaby Chorus" showed careful training. Miss Nina Bagley is certainly a "find" so far as the pianoforte is concerned. Her rendering of Durand's "Valse in E", which by the way, was learned and memorized in a week, was very fine. Perhaps the choice of most people present would be the vocal solo "Love's Coronet" by Mrs. E. Madden. A sweet voice, clear tone, and good enunciation, all combined could not but win the hearts of the audience and an encore was enthusiastically received. The Junior Choir of St. Andrew's sang with fine abandon and excellent enunciation "My Love Has Gone to Battle" and of course they had to come back and provide further delight to the audience. Mr. N. Jamieson showed himself an old hand at the game in his banjo solo and received a great ovation, to which he responded in good natured fashion. The male quartette consisting of Messrs Rhind, Walker, Reid, and Touche, gave a fine rendering of the old melody of the "Kentucky Babe" and responded to an encore with "Ma Punkin Sue". The string trio were heard to advantage in Sonja's "Washington Post March" and we should hear more from them in future for they are certainly worth listening to. The Ladies Quartette gave a sweet rendering of that plaintive Welsh Air, "All Thru the Night" which everyone enjoyed so much that they had to repeat the last verse. In the second portion of the programme Mr. Rhind excelled himself in the well known sea song "Neptune". A delightful interlude was provided by Miss Nina Bagley, M. Corder and N. Day in a piano trio, which was enjoyed just as much by the audience. Finally Goodnight, Goodnight Beloved was tastefully given by a mixed quartette consisting of Messrs F. Cameron, M. Gardner, Messrs Rhind and Touche. The String Quartette "Shepherd's Dance" from German's Henry VIII was well received. The whole programme showed careful training and a great deal of credit is reflected on Prof. Touche, and the town of Lacombe is fortunate in possessing such a capable musician as he has proved himself to be. His next concert will no doubt be looked forward to with keen expectation.

Mr. and Mrs. George Doherty moved to Gull Lake on Saturday last.

WOOL IS CHEAP.

The following letter explains itself: Central Alberta Wool Growers Ass'n. Lacombe.

Dear Sirs: I have just returned from Boston and the market down there for wool is anything but encouraging just at the present time. In fact one would say that there is no market as there is practically nothing doing in wool. This formerly was the condition in the lower grades of wool and just now it covers pretty much all grades including fine. A great deal of interest was being shown in what the results of the Govt. Sales Thursday and Friday of this week would be. Wire from Mr. Abernethy this morning says "Sale Here Shut to Pieces. Mostly Withdrawn. Best Mering Sold \$1.85. This \$1.85 of course represents clean secured basis price of the Saskatchewan and Manitoba wool which we still hold, but at the moment it is out of the question. I met several wool men and everywhere it was the same. It was reported that many of the large wool houses had called their buyers in as well as the salesmen on the road.

The underlying factor applying to the fine wool is held up by the bank of credits with the result, money is tight and given in limited amounts at high rates of interest. In the lower grades the same factor exists, very heavy holdings and few mills using these wools. It is therefore our opinion that under conditions such as exist at present, growers are very fortunate to have their own organization and are well advised to consign their wools through the local association this year. In the East, dealers are very reluctant in going into the field to buy since they do not know where they are at. So far as the present market is concerned we have heard of an offer of 38 c. being made on a choice clip. Such a price was graded medium fine offer of 25c. on general run of wool. This was about ten days ago and we heard today that one of the largest dealers has been offering 19c. in the country. This is not indication of the market value since, as intimated above there is no market price and buyers are very naturally trying to buy at as low prices as it is possible in order that they might be fully protected.

In the case of our advance, as you already know, the grower gets all the profit that is made on the sale price of his wool, less the operating expenses of the organization. So that we can not help but feel that this organization is of more material advantage to the Growers in Canada this year particularly than it has ever been. We have written this for your information to describe in brief, conditions of the wool market at present and would therefore think that a grower to be protected, cannot do better under circumstances existing today than decide to handle his wool through the local association and sale through this organization, since it is no time at present to make anything like a satisfactory sale of wool.

Yours Very Truly

C. E. O'Brien

BASKET BALL

By Barney. The Red Deer Basketball Team defeated the Lacombe Public School team in a game played last night. The Lacombe team evidently have not had very much practice, and were also handicapped by the Red Deer girls being much larger than our girls. Red Deer however played a very clean game and showed very good sports-

BECAME SO THIN SHE WAS AFRAID

FRUIT-A-TIVES Made Her Well, Strong and Vigorous

MADAME ARTHUR BEAUCHER

305 Cartier St., Montreal.

"I suffered terribly from Constipation and Dyspepsia for many years. I felt pains after eating and had gas, constant headache, and was unable to sleep at night. I was getting so thin that I was frightened and saw several physicians who, however, did not seem able to help me.

At last a friend advised me to take 'Fruit-a-tives'. I did so and soon I felt some relief. I continued with 'Fruit-a-tives' and in a short time, the Constipation was banished. I felt no more pains or headache or the disagreeable sensations that follow dyspepsia. Now I am well, strong and vigorous."

MADAME ARTHUR BEAUCHER.

50c. a box, 6 for \$2.50, trial size 25c.

At all dealers or from Fruit-a-tives Limited, Ottawa, Ont.

Manuscript. The game by periods of 15 minutes each is:

1st. Lacombe did not get into play this period, the girls being a trifle nervous, this being their first game with an outside team. Red Deer 9. 2nd period Red Deer 0—Lacombe 1. Only period that Red Deer did not score. If the game had run another period, Lacombe would have had a good chance of winning. However the return game will show which team can play basket ball.

Final Score 11 to 3, in Red Deer's favor.

S. Henderson President of Cal Club

At a meeting of the Aberdeen Angus breeders called on Thursday night at the conclusion of ball sale at Lacombe it was decided to form a calf club for Central Alberta with headquarters at Lacombe and the following directors to represent the different centres: T. R. Richardson, Bowden; Fred Archer, Innisfail; J. F. Day, Red Deer; A. E. Nease, Olds; C. F. Danforth, Bentley; Joe. Capron, Blairmore; John Henderson, Lacombe; George Graham, Bentley; J. H. Morrison, Bentley; J. J. Hall, Morinville; L. H. Neville, Wetaskiwin; Jas. Summers, Estabrook; O. Hansen, Big Valley; C. H. Gilbert, Tees.

Bank of Canada

It is imperative that every agriculturist should have a bank account with a progressive banking institution. This bank is stimulating production by providing a broad service for the farmer. Any of our 400 branches can furnish reliable information as to matters and facilities.

Reserves exceed \$174,000,000.

UNION BANK OF CANADA

Lacombe Branch and Safety Deposit Boxes
W. F. Graham - Manager
Branches also at Bentley, Clive, Rimbey

News of Town.

Lacombe Baseball Team met Ponoka on Tuesday night, and went down in defeat by a score of 2 to 1. It was a good game and our boys showed improvement. But watch them when they get a little more practice. Danner and Cliff Danner were hit in the face by pitched balls, and were taken to a nearby hospital.

"Mr. and Mrs. O'Connell" presented by Olive local talent to the Combs last night was fairly well attended, and the entertainment was very good. It was rather a heavy comedy for local people to tackle, but it was presented very creditably.

All officers and Brothers of Magnet Lodge No. 12 are requested to meet at the Masonic Hall June 5th at 8:30 p.m. Initiatory degree and Memorial Service. Visiting Brothers cordially invited.

Rev. Barnes of Rimbey Motored to Lacombe on Tuesday last.

C. H. Duncan, who has been assistant manager of the Union Bank branch at Calgary, has been appointed manager of the branch at Lacombe. He has had wide experience as manager of branches in both Saskatchewan and Manitoba.

Mr. and Mrs. Lester Cannon leave today for California, where Mr. Cannon will go into business for a couple of years.

Mr. Norris of the Atlas Lumber Co. had the misfortune last week to get his left hand in contact with a buzz saw. One finger was badly lacerated, and we are pleased to say he is not seriously injured.

Herbert Connolly, Jas. Hewitt, and O. Rasmussen of Rimbey were Lacombe visitors this week. They report everything peaceful in the Blinn Valley.

Blackheads and Bentley people are much in evidence in Lacombe these few evenings.

A number of Lacombe people spent Sunday at Gull Lake. We think this year will be one of the best years on record for Gull Lake.

WANTED AT ONCE ABOUT 100 OF THE YOUNG MEN OF LACOMBE TO HELP GET THE BASEBALL DIAMOND IN SHAPE. BEAT AT THIS GROUND. ADDRESS THE TRACK TONIGHT AT SEVEN.

D. Cameron returned on Friday from a visit to his daughter at Great Falls, Montana.

Christ wanted in Lee Cream Parlor Call at Olympia Ice Cream Parlor.

Sunday June 6th.
English church service. Holy Communion 11 a.m. Evening service 7:30 p.m. Sunday school 12 noon. Holy Communion in Milton school at 4 p.m.

Mrs. L. N. Graham has sold the Percheron Stallion Hawkeye Sargent to W. R. Cole of Lacombe. Mrs. Graham has three good young stallions to sell or trade for stock.

Sunset Local U. F. A. meets in the Stephenson school on Saturday June 5th at 8 o'clock. Members please note the change of date.

J. L. Robinson, Sec.

Fair Prices Brought By Female Cattle
Private sales of female Hereford and Shorthorn cattle held here on Friday following the bull sale brought only fair prices. The stock was for most part in pretty poor condition, and for that reason was not so attractive to the buyer. The Shorthorns were sold by E. J. Scott of Lacombe and the Herefords by W. D. Reid also of Lacombe who for reasons of health is leaving for the coast shortly. The herd bull belonging to Mr. Reid, "Oscar Mack" did not sell for the price that the owner was willing to accept and he was withdrawn. The cows and heifers were all sold however for what they would bring. The buyers of bulls had all gone home before the animal was offered which probably accounts for their being no offers for him, for the bull was shown in nice condition and at a weight of a ton.

Adity Herefords, including four young bulls sold for \$400.00 the average on the female cows to about \$100.00. There were only 10 of the Shorthorn cows and heifers sold, the cows selling better than the heifers, the average being \$111.40 for 18. Most of the cows were with calf at foot.

Olaf, Legimer of Bentley bought "Roan Lass" one of the best cows offered.

Horse for Sale
Good work horse about 7 years old, for sale. Apply to C. Boys, Phone 312, Lacombe P.O.

For Sale
A good milk cow due to freshen this week. Apply to E. J. Scott, Phone 914, Lacombe.

Pure Bred Bull for Sale
One pure bred Shorthorn bull, six years old, good looking, apply to J. H. McNeil, S. E. 16-41-27, about 7 miles S. W. of Lacombe.

The Shorthorn Bull
Registered in the Shorthorn Herd book, from the herd of R. E. Edwards, Clancy, Alta. He has been purchased by Theo. Dyer of Lacombe, and will be on service at his barn this season. Terms \$2.00.

Thos. Dyer 32-39

High Cost of Railroad

At the annual meeting of the shareholders of the Canadian Pacific Railway, held in Montreal, Mr. E. W. Beatty, President of the Company, stated that the annual report reflected the situation prevailing in respect of the increased cost of operation. The gross earnings were \$1,711,262. Success of the irrigation block will be extended, less the value of irrigation projects under federal or provincial governments, and the public with adequate efficiency with the progress of the country, expanding the facilities, constructing necessary new lines and supplying the public with adequate efficiency and comfort in service. The railway net earnings of the Company for 1919 represented a return of only four per cent. on the actual cash invested in the railway itself. A nominal surplus of \$184,548 has been placed in reserve to meet the special tax liability imposed by the Dominion Government. The first charges and interest on the preference stock of the Company are low and the dividend of seven per cent payable on the common stock from the railway earnings is moderate. Any corporation must have reasonable surplus. The dividends amounted to less than half of one per cent of the gross earnings. The dividends, therefore, during the past two years were seriously inadequate. Rates should be established which represent a fair return for the service rendered. Profit earned by a Company's efficiency and economy and by the character and extent of the equipment and facilities, should not be confiscated, nor should the revenues accruing to one Company from service well performed be taken to supplement the revenue of a competitor less successful.

The theory that the rates be increased, but that the deficits be met from general revenues of the Company, is economically unsound and discriminating against the public in favor of those using railway facilities. The cost of the equipment and the maintenance of the same is a heavy burden on the public. The rates should be established which represent a fair return for the service rendered. Profit earned by a Company's efficiency and economy and by the character and extent of the equipment and facilities, should not be confiscated, nor should the revenues accruing to one Company from service well performed be taken to supplement the revenue of a competitor less successful.

Paving Way For Franco-German Trade Relations

Berlin.—The German delegates who have returned to Berlin from the Paris industrial conference are fairly well satisfied with the progress thus far, says the *Vossische Zeitung*.

As regards chemicals, says the newspaper, a resumption of relations is possible, provided connections being resumed. In the textile and metal groups, however, agreement was difficult because of the failure to bring together in union persons suitable for an amicable understanding. For example, there was no representative present from Germany's so-called heavy industries. The newspaper says that no decision was arrived at on the necessity for co-operation between certain branches of the French and German industrial trades.

Need More Immigrants

Prosperity of Canada Assured When Country is Filled With Workers

Winnipeg.—That the prosperity of Canada will be assured when the country is filled with workers from Europe, people who will devote all their possible time to the prosperity of Canada, was the substance of a recent statement by W. L. Griffith, permanent secretary of the office of the immigration commissioner for Canada, who is a visitor in the city.

"Farmers with capital are insufficient to increase the powers of production of the Dominion. The workers themselves are necessary," he declared, "so that wages will be a great factor in the expansion of the Dominion's trade."

Back From Exile

King Alexander of Greece Will Return to Throne

Paris.—King Alexander of Greece, who is now in Paris, will return to his capital upon the conclusion of his visit here, it was announced at the Greek legation. This announcement sets at rest the published rumors that the king did not intend to return to Greece, having decided to share the exile of his father, ex-King Constantine, and that he might be succeeded on the Greek throne by an English prince.

Four Bids for Manitoba Bonds

Winnipeg.—Four bids in American funds, each above par when exchange is figured in, were received by the Manitoba government for a six percent government bond issue aggregating \$2,769,000. It was announced that the treasury department. The highest offer was made by the Canadian General Securities Company, a Winnipeg firm, but the tender was limited to a block of \$1,769,000, with a two weeks' option on the remaining \$1,000,000. The offer ranged from \$95.57 to \$96.98.

Low Water on Yukon

Seattle, Wash.—Extremely low water is likely to prevent the opening of navigation on the Yukon river until about June 12, according to advices from the north. It is more than 25 years since the water was so low at this season.

Calgary Miners Present Demands

Calgary.—U. M. W. of A. miners presented their demands for a sixteen percent increase over the present schedule to the operators. The increase will mean a total increase of 27 percent over the scale which was in effect last October.

Irish Question No Concern of U. S.

Washington.—A resolution declaring "The Irish question to be of no concern to the United States," was introduced by Democratic Congressman Connolly from Texas.

G.W.V. President Thinks Time Ripe For General Election

Ottawa.—R. B. Maxwell, of Winnipeg, Dominion president of the G. W. V. A., who has been investigating the political situation has issued the following message to the 776 branches of the association throughout the Dominion:

"From knowledge gained of political and economic aims in Canada on the part of the Great War Veterans' Association to obtain equitable construction legislation, I deem it my duty to urge upon you the necessity of an early general election. Parliament has confessed inability to redeem former pledges, and restore to returned soldiers and dependents in a substantial measure those economic advantages they would now enjoy but for war services."

Attack on Col. Amery

Truth Declares He Is Not A Trustworthy Representative

London.—Truth, which is independent in general politics, but consistently supports free trade, says: "Appropos of the West Indian conference at Ottawa, Col. Amery and Lord Milner are quietly pursuing the project of Imperial preference which should be watched by free traders. The West Indians are crown colonies under the thumb of Downing Street, and though delegates from their various administrations are attending the conference, it is doubtful as to how far they will present the interests and the opinions of the local trading community and the population in general. Arrangements which might be advantageous to Canada might easily be disadvantageous to the West Indies and the Mother country as well. Col. Amery is certainly not a trustworthy representative in this matter. He takes the view that anything which benefits the Dominions benefits us, which is matters of commerce and finance, is mere sensational nonsense."

Sims Replies to Wilson

U. S. Rear-Admiral Declares President's Plan Was Audacious And Certain to Fail

Washington.—While President Wilson's "bold and audacious policy" for the navy was sound, the specific operation he advocated to crush Germany was "impracticable for technical reasons," Rear-Admiral Sims told the senate naval investigating committee.

"However," he concluded, "the aggressive policy advocated was, of course, not the correct course. The sacrifice of half the combined British and American fleets would not have been too great a price to pay if it would have suppressed the submarine and ended the war, but the attempt would have been unwise, as in the opinion of the responsible naval experts, it would certainly have failed."

Viscount French Insulted

Irish Rebels Remove Lord Lieutenant's Name From Freeman's List

Londonderry.—The corporation has decided to remove from the roll of her city's freemen the name of Viscount French, lord lieutenant of Aggregh, the Unionists challenged the legality of the proposal. The mayor of the city voted for it. He said later that if he had not done so, capital would have been made out of his refusal.

Alderman Praisley, proposing the resolution to strike out the name of Viscount French, said that under Lord French the "social and civil life has been tortuous," the alderman declared "that stands for Cromwellian cruelty and is the Pontius Pilate of Ireland."

Circus Crashes Through Bridge

Lethbridge.—One man was killed and another injured, though not seriously, in a wreck of Christie Brothers' circus train which broke through an irrigation canal bridge on the Canadian sub-division of the Canadian Pacific Railway. The engine had passed over the bridge, but the heavily loaded baggage-car crashed through. The dead man and his injured comrade were both circus employees.

Bank of Saskatchewan

Ottawa.—In the senate, Senator Ross presented a petition for the incorporation of the Bank of Saskatchewan, with head office in Regina.

Embargo on Coal Suggested in U. S.

Washington.—Suggesting embargoes by the United States on production required by Canada for her industries to meet the Canadian embargo on pulp wood, the house foreign affairs committee have favorably reported the senate resolution for a special commission to deal with the Dominion government on the subject. Canada, the commission declares, must have coal, and we must have pulpwood. Embargoes on pulpwood, the report says, have restricted mills in the United States, and have prevented the United States from buying this commodity.

Investigate Aviator's Death

Vancouver.—An enquiry has been obtained by the Dominion air board today in the airplane crash which killed E. H. Beasley was killed, according to a message received by Major Claire McLaren, D.S.O. Col. Richard Bell Irving and Major Scott Williams have been appointed to assist Major McLaren in the investigation.

Kolchak Exhibited To Jeering Crowds

Former Russian Commander on Show For Few Days Before His Death

Vancouver.—Admiral Kolchak, former head of the all-Russian government, after his capture by revolutionists, was placed in a cage at Iktok and exhibited for a nominal charge, according to N. Deberg, former member of the Admiral's staff, who arrived from the Orient on the steamer Manila Maru.

Gowda surrounded the cage, according to Deberg, heaping epithets upon Kolchak, and jeering at him. Previously, to Admiral Kolchak's capture, Deberg said, he had journeyed toward the southeast in an automobile, supposedly under the protection of the allied government. Deberg escaped at night in a steamer on which all lights were masked and so reached Tokyo.

Do Not Need Passports

Ottawa.—U. S. Tourists visiting Canada do not require passports as a condition of entry into Canada from the United States or as a condition as to leaving Canada, was the announcement made from the department of the interior.

Welcomes bona fide tourists the statement says, and endeavours every possible courtesy to such travellers in entering and leaving the Dominion.

Mennonites May Leave Swift Current

Receiving Offers For the Land They Contemplate Vacating

Swift Current, Sask.—Jacob Friesen, head of the Mennonite colony south of Swift Current, left a few days ago for Mississippi to make the final arrangements in connection with removal of the Mennonites from this district to settle upon lands in the southern states. Upon the result of Mr. Friesen's negotiations rests the final decision concerning the migration of the Mennonites from Swift Current district, where they own 150,000 acres of the "very best farming lands." Before leaving, Mr. Friesen stated that recent papers had yet been signed guaranteeing special privileges to his people by the United States authorities. If these special privileges were not forthcoming the arrangements for moving to Mississippi would be at an end and the colony would then receive a proposal to move to Brazil. In the meantime, the Mennonites are receiving offers from several quarters for the land they contemplate vacating. Following an offer from an American syndicate recently, efforts are now being made by representatives of French settlers in Maine and Quebec to obtain options on every possible colony farm. The price offered is \$40 an acre to include implements and improvements and the seasonal crop. Crop prospects are so favorable at present that many of the Mennonites will refuse to join in any exodus that may take place. The provincial government has arranged for the erection of several more schools in the settlement and will rigidly enforce the school attendance act.

Villa Will Not Surrender

De Facto Government Has Already Begun Organization Against The Outlaw

El Paso, Texas.—Further efforts to persuade Francisco Villa to lay down his arms were failed, according to General Ignacio Fregue, commander of the Chihuahua Defense Societies, who telegraphed the Mexican consulate here that the de facto government can settle the Villa problem only by force of arms.

The de facto government of Mexico has already begun its threatened organization against Villa. Many hands of troops have been sent into the mountains to hunt down Villa and his band of men.

Italians on Way West

Port Arthur, Ont.—The first party of several hundred Italians who are coming to settle on farming lands in western Canada, reached Port Arthur on a special train, and continued on through to Winnipeg. The party was twenty days crossing from Italy. There were about 100 on the train and more are coming by other steamer.

Prince William Arrives in U. S.

New York.—Prince William of Sweden, second son of King Gustave, arrived here from central America on the United Fruit company's steamship Santa Maria. The prince has been engaged in scientific exploration in central America since early in the year.

To Include Women

Ottawa.—An act to incorporate the Army and Navy Veterans in Canada was amended by a committee of the commons to provide for the inclusion of women's organizations.

Kolchak Was Shot By Revolutionist

Denied Trial, He Smoked Cigarette While Facing the Firing Squad

Victoria.—Details of the killing of Admiral Kolchak, head of the allied government troops in Siberia, were told her by Captain Webb, provost marshal with the British Forces in Siberia, who has arrived here on the steamer Manila Maru from Vladivostok. Through treachery, he said, Kolchak was captured by revolutionists and incarcerated with former Premier Reppeleyoff at Iktok. When placed in front of a firing squad, Reppeleyoff was shot down when he attempted to escape. Kolchak, denied a trial and the privilege of seeing his wife, coolly smoked a cigarette and awaited the volley. The order to fire was disobeyed by the firing squad, whereupon a commissary strode forward, pushed Kolchak's head back and shot him to death with a revolver.

Oppose Extension Of Divorce Laws

Anglican Bishop in Toronto States Case Against Proposed Legislation

Toronto.—Strong opposition to the relaxation of laws governing divorce was voiced by Bishop Sweeney in his charge at the opening of the 68th annual meeting of the Anglican synod of the diocese of Toronto. His lordship referred to proposed divorce legislation and declared that the church of England was opposed to divorce save for the cause allowed by her divine head.

The bishop quoted from legislation accepted by the church in 1905: "No clergyman within the jurisdiction of the Church of England shall solemnize a marriage between persons either of whom shall have been divorced from one who is living at the time." He concluded by saying: "We must oppose, by every legitimate means, any legislation which seeks to enlarge the causes for which divorce is to be granted."

Murderers Escape

Three Men Serving Life Sentence at Boston State Walls Of Prison

Boston.—Herman Barney, who was sentenced to prison for life for the murder of Frederick Charles Deninger, in this city in 1914, Harry Mansfield, serving a life sentence for the murder of Patrolman Joseph Biser, in this city a year ago, and Charles Ward, a negro, serving a 20-year sentence, escaped from the prison in the Charleston district by scaling the walls. They were clad in prison garb.

Increase Rolling Stock

Winnipeg.—This year the Canadian National Railway rolling stock will be increased by the building of 750 freight cars, 80 locomotives and 75 passenger coaches. The additional rolling stock contracted for in 1919 are now almost completed, it was learned. In 1919 new freight cars to the number of 1,549 were built, 50 locomotives and 240 passenger cars.

Gold Dredges in Full Blast

Dawson, Y. T.—The Yukon's fleet of gold dredges are now operating in full blast. The hydro-electric power plant of the Yukon Gold company has started and its dredges immediately began digging. Other dredges also commenced operations. The territory's yield this season will run into millions. The clean up of the winter dumps is under way.

Bumper Crop for Bulgaria

Sofia.—Bulgaria's crops were among the greatest in the country's history and those of this year promise even greater abundance. The country now has so much wheat and maize on hand that she is exporting part of it to Belgium and Poland. The present stocks of these cereals amount to nearly six billion pounds.

Edmonton, Duvogun and B. C. Line Will Probably Be Reorganized

Edmonton.—National ownership of the Edmonton-Duvogun and British Columbia railway is a decidedly remote possibility, according to premier Stewart, who has returned to the city from a two weeks' official trip to Winnipeg. Instead of federal government purchasing the system, as was semi-officially announced by Sir George Foster some months ago, a movement is well under way in the east, it appears, to reorganize the E. D. and B. C. company, and thus bring in sufficient capital to put the road in good shape for traffic and take adequate care of the business in hand.

Wants Drill Sent to Lake Dauphin

Winnipeg.—In a report on the presence of oil in the Lake Dauphin district, Commissioner R. C. Wallace, of northern Manitoba, recommended to the government that a drilling outfit be sent to that district capable of sinking a shaft of 1,000 feet in order to settle the question on and for all and making speculation impossible.

Several Wounded

Rome.—Several persons were wounded in the disturbance Monday at Taranto, arising from the celebration of Italy's entry into the war.

Pres. Wilson Vetoes Peace Resolution

Rejection of the Treaty Means Seclusion Isolation For U. S.

Washington.—The Republican peace resolution was vetoed by President Wilson.

"Such a method of making peace with Germany," the president said, "would place an ineffaceable stain on the gallantry and honor of the United States."

Without announcing his intention regarding the treaty of Versailles, the president declared that the treaty embodied the important things omitted by the resolution and said that by rejecting the treaty, the United States had declared in effect that it wished "to draw itself up and out of the interests of our own."

The president added that the peace resolution omitted mention of many important objects for the vindication of which the United States entered the war.

Stores of Sugar to Be Sent Abroad

Halifax.—An interesting commentary upon the announcement that sugar is due for another advance is to be found in the fact that great quantities of sugar are being shipped here, presumably for exportation abroad. It is stated that several hundreds of thousands of bags of sugar are at present awaiting shipment at one pier and that the quantity is daily increasing. At another pier upwards of a quarter million bags of flour are waiting shipment abroad.

Good Prospects for Trade With Japan

Canada Must Wake Up Or Opportunity Will Be Gone

Vancouver.—Unless Canada takes steps in the immediate future to establish trade relations with Japan on a larger scale than exists today, the Dominion will be forestalled and the opportunity gone, is the opinion of Arthur E. Bryan, Canadian trade commissioner to Japan, who is here to attend the Canadian manufacturers convention next month. There are excellent prospects of a very large volume of trade with Japan, Mr. Bryan stated. The value of American export with that country during last year was 700,000,000 yen, and the U. S. is doing all in its power to increase trade with the Japanese.

"Unless Canada wakes up," Mr. Bryan said, "very soon, she needn't wake up at all, for she will be forestalled."

Mr. Bryan will address the delegates to the Canadian manufacturers' convention here. He will then leave for Ottawa to encourage the furtherance of trade with Japan.

Aid Asked for Soldiers

Room For Returned Men in the B. C. Fisheries

Ottawa.—The return of the returned soldier in the fishing industry of British Columbia was urged upon the special committee on pensions and re-establishment by Col. W. Peck, V.C., Skeena. Col. Peck said there was room for returned men in the B. C. fisheries and a fishing industry controlled by white men should be built up. This would also solve the unemployment problem to a great extent and would mean a greater production of food.

Loans to encourage the fisheries industry were not a new idea. Money was provided by some countries for placing engines in fishing boats and otherwise energize the industry. In Britain demobilized fishermen are assisted in acquiring steam drifters, steam trawlers and other fishing craft.

Government May Not Take Over Board

Edmonton, Duvogun and B. C. Line Will Probably Be Reorganized

Edmonton.—National ownership of the Edmonton-Duvogun and British Columbia railway is a decidedly remote possibility, according to premier Stewart, who has returned to the city from a two weeks' official trip to Winnipeg. Instead of federal government purchasing the system, as was semi-officially announced by Sir George Foster some months ago, a movement is well under way in the east, it appears, to reorganize the E. D. and B. C. company, and thus bring in sufficient capital to put the road in good shape for traffic and take adequate care of the business in hand.

Wants Drill Sent to Lake Dauphin

Winnipeg.—In a report on the presence of oil in the Lake Dauphin district, Commissioner R. C. Wallace, of northern Manitoba, recommended to the government that a drilling outfit be sent to that district capable of sinking a shaft of 1,000 feet in order to settle the question on and for all and making speculation impossible.

Several Wounded

Rome.—Several persons were wounded in the disturbance Monday at Taranto, arising from the celebration of Italy's entry into the war.

New Law Places Restrictions On Race Track Betting

Compelled Farmer To Give Up Land

Sinn Fein Forbids Purchase Over the Heads of Local Young Men

Dublin.—Control of Irish land by the Sinn Fein is very effective, as is indicated by an occurrence at Carrick-on-Shannon, which was reported here. A farmer named Morrison was summoned before the Sinn Fein land committee to show why he had attempted to buy land over the heads of young men of the district who did not own property. He had just purchased a grazing farm for \$3,500, and told the committee he had bought it for his two brothers in the United States. The committee warned him to surrender it immediately, which he agreed to do with reluctance.

Unknown persons have seized and sunk Lord Kington's yacht, the *Wreath*, at Carrick-on-Shannon, apparently because Lord Kington entered a claim for \$2,000 for the destruction of a police barracks on his property. The claim was subsequently withdrawn, but no public announcement of this step had been made.

Increased Savings Deposits

High Level Reached During Month Of April

Ottawa.—The bank statement for April, just issued by the finance department, showed a continued increase in savings bank deposits. They now stand at the new high level, \$1,209,000,000 as compared with \$1,070,000,000 a year ago and \$933,000,000 at the end of April two years ago.

Call loans in Canada were rather lower than shown in the statement for March. Current loans in Canada are about twenty-five millions higher.

Denial by Krupps

Declare They Are Not Making Any War Material

Berlin.—Statements from Paris that the Krupps are manufacturing war materials are countered by the Krupps in a communication to the *Frankfurter Zeitung*, which says the French republic is aware of the fact that they are not manufacturing war materials.

Peace Delegations Reach Agreement

London.—The British and Bolshevik peace delegations, which have been sitting at Moscow, have reached an agreement by which Russia recognizes the complete independence of Latvia, according to a statement from an official Latvian source in London.

An agreement has been reached on the frontier questions, with the exception of some minor technical details such as the occupation of the Drissa district, where there will be a plebiscite. Economic questions have not yet been discussed.

Vegetables Drop in Chicago

Chicago.—Prices of all vegetables dropped from five to thirty-five percent on the Chicago market in the last ten days, commission merchants said recently. Market experts said the decline in prices was due to increased receipts.

To Duplicate Cable

Vancouver.—The Pacific cable board is considering the duplication of its cable from Canada to the Antipodes, John Millwood, manager of the board, has announced.

Big Elevator Deal

Winnipeg.—One of the biggest deals in grain storage space ever consummated here is announced. The Leitch-McLean Elevator company has purchased 17 elevators from the Imperial Elevator company and one from Hallet and Carey.

Germany Hands Over Rolling Stock

Berlin.—The minister of transportation has announced that the delivery of 5,000 locomotives to the train in accordance with the peace treaty, has been completed.

U.S. Has to Face Crucial Decision in Regard to Armenia

London.—"President Wilson has presented a dramatic challenge to congress and his countrymen upon subject of their international duties," says the *Pall Mall Gazette*, dealing with the Armenian question. "He has asked for authority to accept a mandate for Armenia in the name of the United States, and the answer will be fraught with moral consequences of the highest importance."

"Great Britain has all the responsibilities that she can carry; none of the other European powers are prepared to take Armenia under their jurisdiction; the league of nations, favored by America in words, but rejected in fact, has no resources or capacity for playing protector. If the United States refuses the charge it means the abandonment of the Armenian question, which, around her on every side, and probably the eventual extermination of a race already decimated by hideous cruelty."

"It is a crucial decision which congress is invited to take. If its answer is in the negative it must register in sinister the value to be placed upon United States moral enthusiasm."

Ottawa.—Profits of racing associations are limited according to the amount bet on each race by a provision of the amendments to the criminal code in the commons, by Hon. C. J. Doherty.

These additions provide that betting shall be by the pari-mutuel system only, and that profits of race-track owners shall be limited to 7 per cent of the amount bet on each race where that amount is under \$20,000. On all amounts over \$20,000 and under \$30,000 the percentage is restricted to six percent.

In each case the percentage of the racing club or association is to be governed by the total amount collected by the mutual system. There is also a change in regard to the breaks which the association is allowed to retain. They will be allowed to retain a percentage, a multiple of five percent, over and above the earnings. There will be an official at each track to see that no bets are accepted after the horses come to the post in each race, when the machines must be locked, and in that way it is aimed to check any attempt at fraud. Racing, as a result of this, will be cleaner.

All the present conditions regarding the operation of the betting on race-tracks, with regard to the number of days of racing, etc., are continued in force, and the provision that pari-mutuels alone shall be used and that profits shall be restricted as above are added to the present charges.

No definite date is set for the bill coming into effect.

Welcome to Prince

Railway and Tramway Strikes Which Had Been Threatened Did Not Develop

Melbourne.—In Melbourne the Prince of Wales has been well acclaimed. A fleet met the Renown, while airplanes circled over the harbor. Three thousand pigeons were released in the midst of the cheering crowds as the prince disembarked and drove through the thronged streets.

The railway and tramway strikes which had been threatened by the unions did not develop.

Wheat Crop Dried Out

Washington.—The wheat crop of New South Wales has been so disastrously affected by drought that the yield probably will not be sufficient to meet domestic consumption in Australia, said a report from the U. S. consulate at Sydney. The crop was estimated at 4,296,000 bushels, the smallest yield in 20 years.

Canada's War Indemnity

Ottawa.—Canada's reparation claim against Germany for losses sustained by the country and by individual citizens during the war, has been forwarded to England for presentation at a conference of representatives of all parts of the British Empire soon to be held in London and subsequently at an inter-allied conference at Spa. The bill rendered by the Dominion is for a total of \$1,871,000,000.

C. P. R. Lines Spread With Hopper Poison

Winnipeg.—By C. Coleman, vice-president of western lines of the C. P. R., has received instructions from the coast to have all the rights of way of the C.P.R. in the grass-hopper infested areas spread with hopper bait. The ingredients of the bait will be supplied to the company at cost by the provincial governments of Manitoba and Saskatchewan.

Germany Hands Over Rolling Stock

Berlin.—The minister of transportation has announced that the delivery of 5,000 locomotives to the train in accordance with the peace treaty, has been completed.

MOST SUCCESSFUL
SALE OF BULLS

Good weather, good attendance, good animals and satisfactory prices were the auspicious features of the opening of the eleventh annual bull sale at Lacombe, Alberta, held in the midst of one of the best farming communities in Alberta, and the farmers are noted for their good pure bred stock. However with the bad season behind and the cutting down of the herds, considerable competition was felt in putting on this sale this year, especially when there were found to be 515 entries. There was, however, a very agreeable surprise to find the animals in such good condition after the year of expensive feeds. The general average of animals so far as quality is concerned, is generally considered to be above that of the annual sales at any other sale that has been held this spring in the west. There were however some very poor animals entered in all the breeds.

The judging of the bulls took place Wednesday morning, John Wilson of Innisfail, judging the Herefords, and the Angus, and A. E. Meyer, the Short horns. There were 158 Short horns shown, 68 Angus and 89 Herefords. No Dairy cattle were entered. The sale started promptly at two in the afternoon with S. W. Pasley and J. W. Durno in the auctioneer's box.

The first afternoon there were 197 head Short horns under thirty months old sold for \$24,985 or an average of \$25.50. The yearlings were quite all sold the first day. J. L. Walters of Olive had an outstanding bunch of young bulls between the ages of 18 and 30 months and these brought a splendid average, the sixteen selling for an average of \$36.25. They were all bred by himself and were a most creditable lot for any breeder to turn out.

They were sold by Eecana Brandman and by M. L. Ringlander. The top price was brought by Chief of Staff, just two years old on the 24th of May, a beautiful light roan which brought \$510.00.

Fifty four Short horns between the ages of 18 months and thirty months sold at an average of \$24.40. Fifty two yearlings averaged slightly over \$200.00.

Among the calves which came next there were several which went cheap and will cut down the general average considerably. Wm. Sharpe of Lacombe had the first prize in this lot and a nice upstanding animal he was, with straight back and plenty of depth. He brought \$350.00.

There is no doubt that the buying by R. S. Hamer of the Dominion Live Stock branch, materially helped the sale. On Tuesday afternoon, Mr. Hamer bought 25 short horn bulls averaging \$200.00 each.

Red Land owned by Harold Talbot of Lacombe was the champion for the Short horn breed and sold for \$450 to Thos. Finlayson of Castor. He was a dark red and a thick blocky animal just about eighteen months old. Reserve champion was Chief of Staff, the animal which took the top prize. There were both Alberta bred animals.

During the mornings judging there were some nice animals came before the judges and in small classes where the judges did not think that the animals merited a first prize he was held down where it was considered he belonged.

In the class for Short horn Calves born after the first of 1919, W. W. Sharpe of Stettler won first, third and fourth prize, with F. L. Gillies of Gadsby second. For the class born between July and Dec. 1918, Harold Talbot of Lacombe was the first with Walters second. In the two year old, Walters got first, second and third. He also won first place for bulls born the first half of 1917. W. S. Dunlop and Son of Calgary was first with Fred Christie of Blackfalds second. For 1916 bulls, J. A. Broderston of Lacombe took the red ribbon with Guy Meadows of Tees, second and J. J. Kishawa was the winner of the 1915 bulls, C. H. Stratton, of Donalds, second.

In the Aberdeen-Angus the championship both in the open class and in the Alberta bred Animals was won by Enjoinder 35A, shown by Thos. Henderson of Lacombe a calf bred by the exhibitor and sired by Enjoinder of Glenora, Wm. Sharpe, shown by D. G. Peat of Loversna, Sask. won reserve for Alberta bred bulls in the Angus breed, and in the open class the reserve went to Halligan Lad 3rd, shown by O. J. Granlin of Stavelly. This calf will not be two till October and was bred at the Ohio Agricultural station.

This Henderson won first in the calves born since the first of 1919, with D. Cameron of Enora, second and third with calves imported from Ohio. For 1917 bulls, Frank Jones of Lacombe was first, T. G. Milnes, Clarksburg, second. For 1916 bulls, D. G. Peat was again winner with J. W. McElroy of Calgary, second.

Championships both in the Alberta bred and the open class of Herefords was won easily by Donalds Brae, an outstanding bull shown by Fred Cowman of Cremona. McKennie Bros. of Kneehill Valley took the reserve in the Championships with Logan 15th. The champion is coming five years old and was bred by Cowman from the sire Sir Bruce. He is a splendid type Hereford and stood out by himself.

The reserve was also bred by the owners, and was sired by Logan. In the young class Chas. Clary of Erskine was first and third. In the Reserve class Chas. Clary of Erskine was first and second.
